Projects

• My Portfolio

My portfolio, in which I display my personal information, in addition to my skill set, experience and training I have gained, as well as details about the projects I have built, with the ability to communicate with me through my social media links.

(HTML, CSS, Tailwind, JS, Typescript, Next.js, Sanity, i18n)

<https://github.com/MahmoudNasser1242000/portfolio> 📄

• E-Commerce App (Fresh Cart)

An application that displays products with the ability to purchase after adding the product to the shopping cart or the favorite products page, with the ability for managers to add, delete, or modify any product, and also the online payment feature

(HTML, CSS, Reactjs, React query, Bootstrap)

<https://github.com/MahmoudNasser1242000/e-commerce-app> 📄

- **Full Stack E-commerce App (My Store)**

It's an e-commerce application that allows the user to display a wide range of products, with the ability to add a product to the shopping cart and make electronic payments. An email is also sent to the customer confirming the successful purchase. Users can also filter products by price and category. The product cannot be purchased or added to the shopping cart until after logging in to ensure security.

(HTML, CSS, Tailwin, JS, Typescript, Shadcn, Next.js, Sanity, Clerk, Resend)

https://github.com/MahmoudNasser1242000/E-commerce-application-next.js-sanity_ 

- **Fullstack Todo App**

An application that displays the user's daily tasks with the ability to delete and modify them, in addition to having a login system for the user with his own account and saving his data

(HTML, CSS, Typescript, Tailwind, Next.js, Prisma, Clerk)

<https://github.com/MahmoudNasser1242000/fullstack-todo-app-with-nextjs> 

- **Booking App (Prescripto)**

A medical reservations application that allows the user to search for a doctor in various specialties and choose the appropriate appointment according to the appointments of each doctor, with the ability to modify the appointment or delete the reservation, and each user has his own profile. Also, with the ability for managers to view the dashboard and modify any doctor, user, or both, and also many other features

(HTML, CSS, Tailwind, React.js, Redux Toolkit, Restful Api)

<https://github.com/MahmoudNasser1242000/Prescripto-Frontend> 

- **Quiz App**

The Yom application displays more than one question in different fields and displays the final score to the contestant

(HTML, CSS, Bootstrap, ES6, JQuery, OOP)

[https://github.com/MahmoudNasser1242000/quiz-app at final-result](https://github.com/MahmoudNasser1242000/quiz-app_at_final-result) 

- **Games-Reviews App**

An application that displays many electronic games in various categories with the ability to display the rating of each game in addition to details about the game and a link to download it from the official website

(HTML, CSS, Bootstrap, ES6, OOP)

<https://github.com/MahmoudNasser1242000/games-reviews>
